

GreenPages & Kaspersky Three Great Network Security Promotions!

GreenPages and Kaspersky Lab have teamed up to offer you three great options to help protect your entire network from modern security threats such as viruses and other malicious programs, hacker attacks, spyware, and spam.

- 1. Free Network Security Perimeter Sweep with authorized Kaspersky Purchase***
- 2. New Kaspersky Network Security Server Jump Start Options***
- 3. New Kaspersky/GreenPages Platinum Support Option***

1. Free Network Perimeter Security Sweep (with any authorized purchase of 150 seats or more)

Powered by eEye's Retina® software, GreenPages' comprehensive perimeter sweeps uncover a broad range of network security holes and vulnerabilities. Right now, we're offering a free network security perimeter sweep (up to 25 total public IP addresses) \$1,000 value. Limited time offer.

GreenPages Network Security Perimeter Sweeps Offer:

- ✓ Fast, accurate scan of network devices, OSes, and applications
- ✓ Identification of network security vulnerabilities
- ✓ Identification of missing application updates
- ✓ Identification of zero day threats
- ✓ Identification of spam and blacklist issues

2. Kaspersky Installation Jump Start Option (available for any size Kaspersky anti-virus installation)

This program is a set of standard offerings that can assist with a new Kaspersky installation on your server. Kaspersky Lab's award-winning antivirus and Internet security software protects companies in today's increasingly dangerous malware environment. GreenPages' engineering team will get you up and running quickly.

Kaspersky Network Security Jump Start Includes:

- ✓ Remote review of your existing Symantec configuration
- ✓ Creation of best practices template
- ✓ Remote assistance with initial configuration or creation of a virtual image with Kaspersky server
- ✓ Assistance with rollout of 5 test clients
- ✓ Review and modification of client settings (one session)

All Systems Go!

Three Jump Start Installation Options are available. Choose the one that fits your timeline and project scope:

- ✓ **Remote Installation.** GreenPages installs your Kaspersky software remotely. GreenPages gives you a thorough walkthrough upon installation so you know how to manage everything.
- ✓ **Virtual Installation.** GreenPages creates a virtual image that includes the Kaspersky base so you have fewer steps to implement.
- ✓ **Onsite Installation.** GreenPages' certified field engineers come to your organization and take care of all aspects of the Kaspersky installation onsite. Pricing includes travel to anywhere in the U.S.

NOTE: GreenPages can also provide full installation and support for any size rollout.

Kaspersky offers the best, most integrated protection.

Key Features :

- ✓ Highest detection rates in the industry
- ✓ Optimized for lowest possible impact on system resources
- ✓ Fastest response to the latest threats

3. Kaspersky / GreenPages Platinum Support Option

GreenPages and Kaspersky have teamed up to provide the next level in protection and support for your network. Rather than simply provide phone support, this new option combines antivirus server monitoring and reporting with escalated support contacts with Kaspersky engineers.

Features Include:

- ✓ Server monitoring (including hardware, operating system, and Kaspersky engine)
- ✓ Regular review and update of virus definitions
- ✓ Update on key alerts
- ✓ Automatic reporting on issues
- ✓ Escalated support contacts within Kaspersky

Program starts at \$1,000 per quarter and includes options for field support, emergency 7x24 services, and coverage of additional equipment on your network.

Choose GreenPages and Kaspersky
